Orders and More

Your All-in-One B2B E-Commerce Platform

Total Control. One Platform.

The Challenge: Fragmented Tools Hold You Back

E-commerce companies across Egypt and the Middle East face a persistent challenge: managing their operations across **multiple disconnected systems**. Order management sits in one platform, shipping in another, pricing rules in spreadsheets, and storefronts require separate development.

This fragmentation creates serious operational pain points that slow growth and drain resources.

Higher Operating Costs

Multiple subscriptions, licenses, and integration fees add up quickly

Limited Visibility

Data scattered across systems makes real-time decisions impossible

Slower Growth

Manual processes and disconnected workflows limit scaling potential

Integration Headaches

Custom APIs and middleware create technical debt and maintenance burden

Orders and More eliminates these pain points by centralizing all operations in one powerful, integrated platform.

One Platform, Complete Control

Orders and More is a **modern B2B e-commerce platform** specifically engineered for wholesalers, retailers, and enterprise merchants who demand operational excellence without compromise.

Built for Scale

Whether you're managing 500 SKUs or 50,000, Orders and More provides the infrastructure you need. Our modular architecture adapts to your business requirements, growing seamlessly as your operations expand.

- End-to-end operational control from a single dashboard
- Modular design allows you to activate only what you need
- Enterprise-grade security and reliability

One Platform, Complete Control

Orders and More is a **modern B2B e-commerce platform** specifically engineered for wholesalers, retailers, and enterprise merchants who demand operational excellence without compromise.

Built for Scale

Whether you're managing 500 SKUs or 50,000, Orders and More provides the infrastructure you need. Our modular architecture adapts to your business requirements, growing seamlessly as your operations expand.

- End-to-end operational control from a single dashboard
- Modular design allows you to activate only what you need
- Enterprise-grade security and reliability

Proven Performance

Leading brands in retail, food & beverage, and wholesale distribution trust Orders and More to power their digital commerce operations across Egypt and the region.

- Seamless third-party integrations with ERPs, payment gateways, and logistics providers
- Extensive customization options for unique business requirements
- Dedicated support from IKEN Technology's expert team

Comprehensive Feature Set

Orders and More delivers eight integrated modules that work together seamlessly, providing complete control over your B2B e-commerce operations.

Vendor & Catalog Management

Centralize product data, manage thousands of SKUs, and maintain sophisticated category hierarchies with ease.

Order Management

Track orders in real-time, coordinate multiple vendors, and automate order processing.

Pricing & Discounts Engine

Configure tiered pricing, volume discounts, and promotional rules that update dynamically across all channels.

Payment & Checkout

Accept payments globally with integrated gateways and Tas-compliant invoicing.

Delivery & Shipping Management

Automate fulfillment with real-time tracking, multi-zone delivery rules, and logistics provider integration.

UI Manager

Launch beautiful e-commerce websites and mobile apps with predefined themes or custom development.

Analytics & Reporting

Monitor performance with real-time dashboards, vendor KPIs, and exportable reports.

Customer & Support Portal

Track order status in real-time and send automated notifications to keep customers informed throughout the fulfillment process.

Vendor & Catalog Management

Centralized Product Intelligence

Managing large product catalogs shouldn't require armies of data entry staff. Orders and More provides sophisticated tools to handle product information at scale, with features specifically designed for B2B complexity.

Bulk Operations

Upload and update thousands of SKUs simultaneously using Excel imports or API integrations. No manual entry required.

Advanced Hierarchies

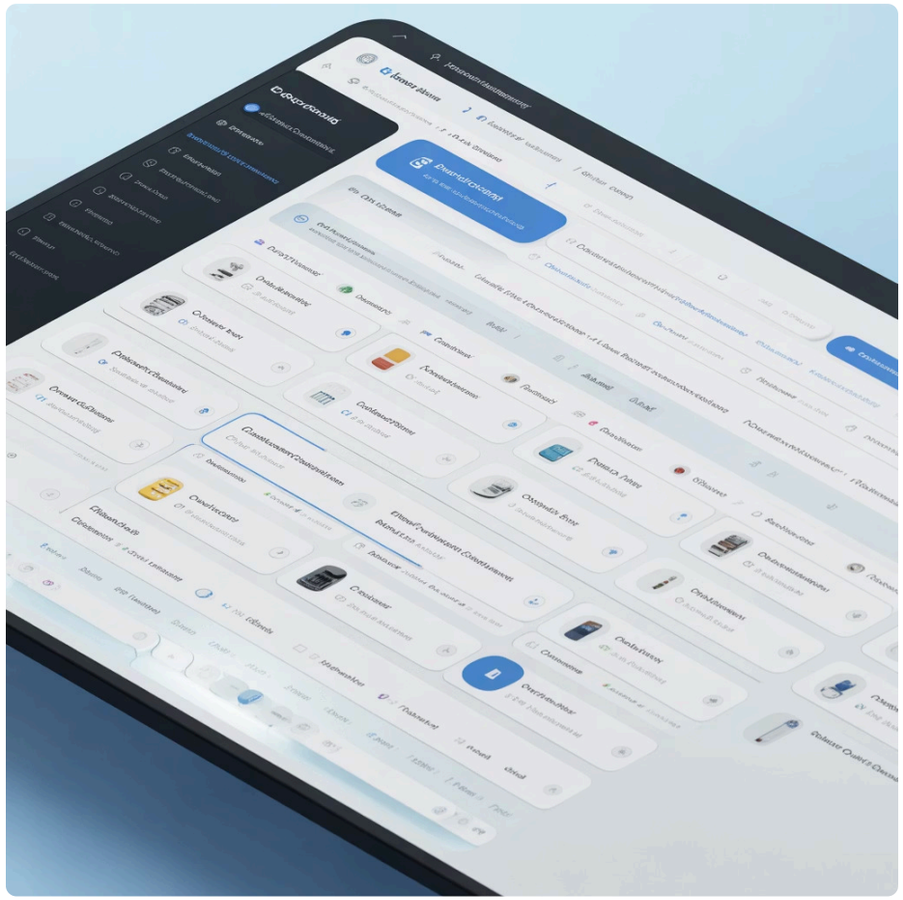
Build sophisticated category structures with unlimited depth. Support multiple classification schemes for different business units.

Global Ready

Native support for multiple languages and currencies. Display products appropriately for each market without duplicating data.

Real-Time Sync

Inventory levels update instantly across all channels. Prevent overselling and maintain accurate stock visibility.



Pro Tip: Our advanced catalog management has helped retailers reduce product data errors by over 80% while cutting catalog maintenance time in half.

Order Management

Order management requires handling complexity that consumer platforms can't match. Orders and More provides enterprise-grade order processing built specifically for wholesale and bulk purchasing scenarios.

1

Real-Time Order Tracking

Monitor every order from placement through fulfillment with detailed status updates. Buyers and vendors see the same information simultaneously, eliminating confusion and support calls.

2

Multi-Vendor Coordination

When a single order contains items from multiple suppliers, Orders and More automatically splits and routes sub-orders to the appropriate vendors while maintaining unified tracking for the buyer.

3

Bulk Processing Power

Process hundreds of orders efficiently with fulfillment, and invoicing. Perfect for high-volume operations where speed matters.

4

Automated Documentation

Generate compliant invoices and delivery notes automatically. Export data seamlessly to accounting and ERP systems.

Pricing & Discounts Engine

Sophisticated Pricing Logic

B2B pricing is complex. Different customers deserve different prices based on volume, relationship, and purchasing history. Orders and More handles this complexity elegantly.

Tiered Pricing

Set custom price lists by customer segment, individual account, or vendor. Create as many pricing tiers as your business requires.

Volume Discounts

Reward larger purchases automatically with quantity-based pricing rules. Configure breakpoints, discount percentages, and promotional codes.

Dynamic Updates

Price changes propagate instantly across all channels—website, mobile app, and API. No delays, no inconsistencies.

The pricing engine integrates seamlessly with your catalog and order management, ensuring customers always see accurate pricing tailored to their account while your team maintains full control.

Payment & Checkout

Flexible Payment Processing

Orders and More understands that B2B transactions require more than simple card processing. Our payment infrastructure supports the full range of business purchasing methods used in Egypt and internationally.

Global Payment Integration

- Connect with leading payment gateways including Fawry, PayMob, and international providers
- Accept credit cards, bank transfers, and digital wallets
- Multi-currency support for cross-border transactions

Built for Egypt: Full compliance with Egyptian regulations and seamless integration with local payment providers ensures smooth operations for Egyptian businesses.

Delivery & Shipping Management

NEW: Complete logistics control from a single platform

Efficient delivery management separates successful e-commerce operations from those that struggle with fulfillment. Orders and More provides comprehensive shipping and logistics tools that integrate seamlessly with your order management.

01

Real-Time Shipment Tracking

Monitor deliveries from warehouse to doorstep with live status updates and GPS tracking integration.

02

Logistics Provider Integration

Pre-built connections with Aramex, Bosta, and other regional carriers. Add your preferred providers easily.

03

Fleet Management

Support for both in-house delivery teams and outsourced logistics. Optimize routes and track driver performance.

04

Smart Delivery Rules

Configure multi-zone delivery with custom scheduling, blackout dates, and automated fee calculation based on distance, weight, and urgency.

> "Delivery management is often the bottleneck in e-commerce operations. Orders and More eliminates this constraint completely."

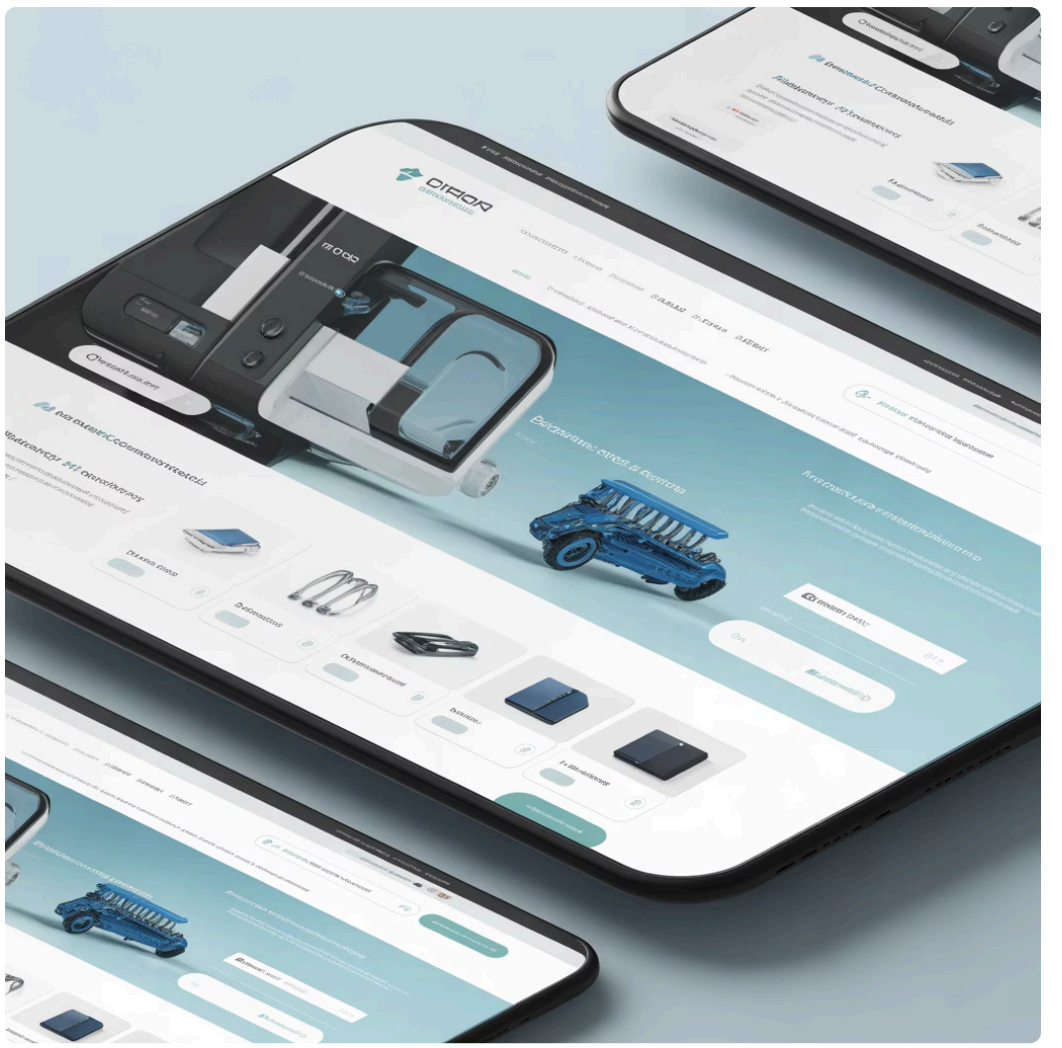
UI Manager: Your Digital Storefront

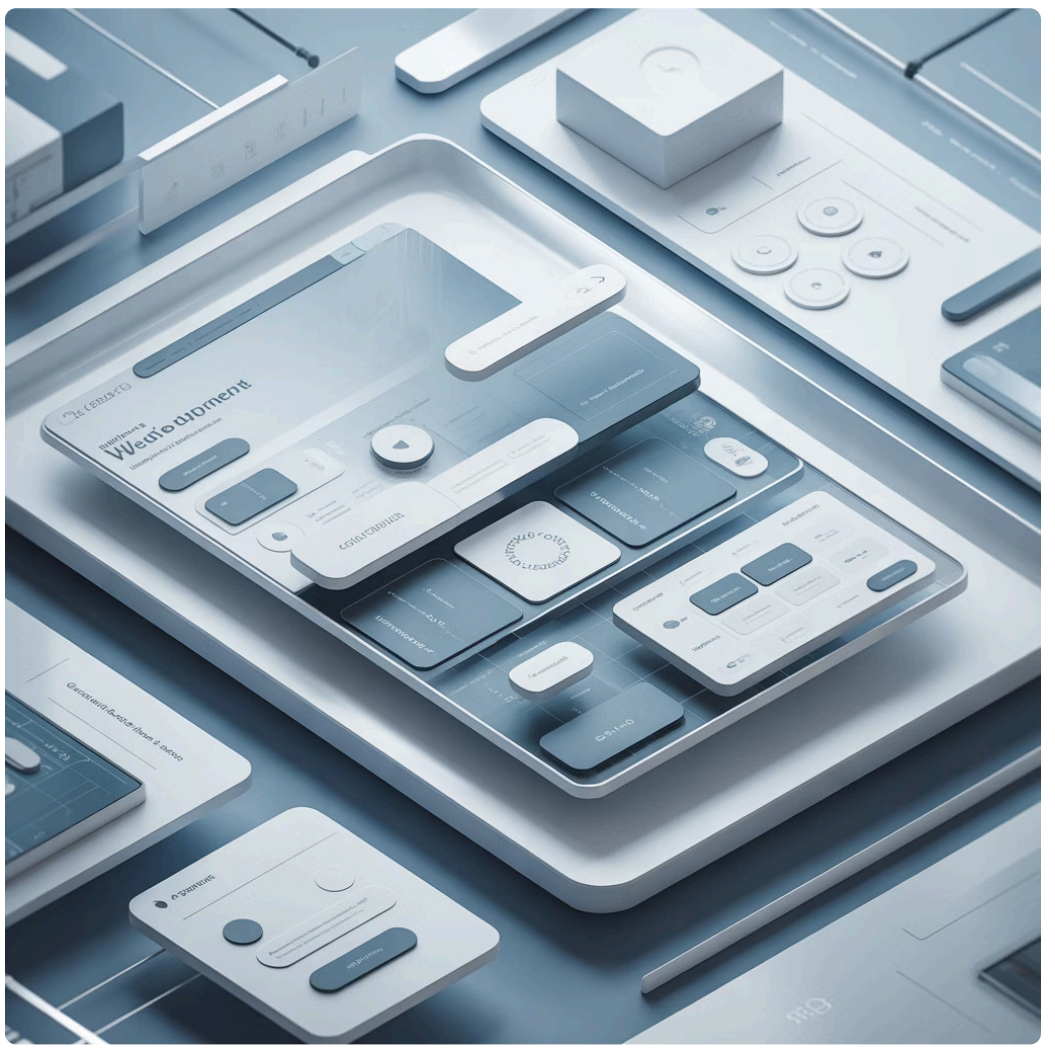
NEW: Launch beautiful e-commerce experiences without separate development projects

Predefined Themes

Choose from professionally designed, high-performance themes optimized for B2B e-commerce. Each theme is mobile-responsive, fast-loading, and conversion-optimized.

- Launch your website and mobile apps from one platform
- Full synchronization with backend systems—catalog, pricing, inventory, and shipping
- Customizable branding, colors, and layouts
- No technical expertise required for basic customization





Custom Theme Development

For brands with specific requirements or unique design visions, our team provides on-demand custom theme development services.

- Bespoke designs that perfectly match your brand identity
- Advanced functionality tailored to your business processes
- Custom domain support and app store publishing
- Ongoing optimization and enhancement

Analytics & Reporting

Data-Driven Decision Making

You can't improve what you don't measure. Orders and More provides comprehensive analytics that transform raw operational data into actionable business intelligence.

Real-Time Dashboards

Monitor critical metrics as they happen. Sales performance, order volumes, inventory levels, and customer behavior—all updated live.

Vendor Performance

Track fulfillment speed, order accuracy, and customer satisfaction by vendor. Identify top performers and areas for improvement.

Inventory Intelligence

Understand stock turnover, identify slow-moving items, and optimize reorder points based on historical patterns.

Seamless Exports

Export reports directly to your ERP, accounting systems, or spreadsheets. Compatible with standard formats and APIs.

How It Works: Six Steps to Success

Getting started with Orders and More is straightforward. Our proven implementation process ensures you're operational quickly while maintaining quality and completeness.

Onboarding

Quick vendor and buyer account setup with guided configuration. Import existing customer and vendor data or start fresh.

Catalog Setup

Bulk upload your product catalog with all associated data—pricing, images, descriptions, and inventory. Our team assists with data mapping and validation.

Orders & Checkout

Configure your order workflow, payment methods, and checkout process. Test the buyer journey to ensure smooth operations.

Shipping & Delivery

Integrate logistics providers, define delivery zones, and set up automated fulfillment rules. Test end-to-end delivery tracking.

Storefront Launch

Choose your theme or work with our team on custom development. Configure branding, launch your website and mobile apps.

Analytics & Growth

Monitor performance with real-time insights. Continuously optimize based on data. Scale operations as your business grows.

Flexible Pricing Options

Choose the deployment model that best fits your business strategy and budget. Both options include full access to all platform modules.

💻 Annual Cloud Subscription

$5,000

per year

What's Included:

- All eight platform modules
- Delivery & shipping management
- UI Manager with predefined themes
- Cloud hosting and infrastructure
- Automatic updates and new features
- SLA-guaranteed uptime
- Standard support and maintenance

Best for: Companies seeking predictable operating expenses with no infrastructure management burden and limited number of stores and vendors.

🏷️ One-Time License (Module-Based Pricing)

Custom Quote

Single Upfront Investment - no recurring license fees

What's Included:

- Perpetual license for all modules
- Self-hosted deployment
- Full source code access
- Initial setup and configuration
- 90 days of post-launch support

Optional: 25% annual support fee for ongoing updates, maintenance, and technical support

Best for: Enterprises with specific compliance requirements or preference for on-premise infrastructure.

🏢 Enterprise Plan (multiple vendors - B2B)

Custom Quote

For large-scale B2B and multi-vendor commerce operations

What's Included:

- Designed for companies managing a large number of stores and vendors.
- Includes everything in Option 1 with enterprise-grade scalability.
- Advanced infrastructure support, high availability, and performance optimization.
- Tailored pricing and deployment based on your business model.

👉 *Contact our sales team for a customized proposal.*

Custom Development: Both pricing options support integrations and scalable customization. Additional feature development available at competitive rates.

Team-as-a-Service for E-Commerce

Scale your technical capabilities without the overhead of hiring and managing an in-house team

Dedicated Resources, Flexible Engagement

Many e-commerce businesses need ongoing development support but don't want the complexity of building and managing their own technical teams. Our Team-as-a-Service (TaaS) model provides dedicated product, development, and DevOps resources that function as an extension of your organization.

Ideal for businesses that need:

- Advanced integrations with external systems (ERPs, WMS, CRM)
- Continuous theme development and UI enhancements
- Custom feature expansion tailored to your processes
- SLA-driven delivery with guaranteed response times
- Ongoing optimization and performance improvements

3x

Faster Delivery

Than traditional hiring and onboarding

40%

Cost Savings

Compared to full-time employees

100%

Scalable

Team size adjusts to your needs

Flexible Engagement Models

1

Monthly Retainer

Reserve dedicated team capacity with predictable monthly costs. Perfect for ongoing development needs and continuous improvement.

2

Milestone-Based

Engage for specific projects with clear deliverables and timelines. Pay based on completed milestones rather than time.

3

Hybrid Model

Combine retainer for core capacity with sprint-based projects for larger initiatives. Maximum flexibility for complex needs.

Why Orders and More?

Leading brands across Egypt choose Orders and More because we deliver results, not just software

Proven Success

Trusted by leading retailers, wholesalers, and F&B brands across Egypt and the Middle East. Our clients have processed millions in transactions and continue to grow with our platform.

Modular Architecture

Start with what you need today, expand tomorrow. Our flexible design means you never pay for features you don't use, but they're ready when you need them.

Integrated Delivery & Storefront

Unlike competitors who require separate systems for logistics and customer-facing experiences, Orders and More provides complete integration out of the box.

Lower Total Cost

Eliminate license fees for multiple systems, reduce integration costs, and decrease support overhead. Most clients see ROI within the first year.

IKEN Technology Expertise

Backed by years of e-commerce and enterprise software development experience. We understand the Egyptian market and global best practices.

> "Orders and More isn't just a platform—it's a partnership. The IKEN team understands our business and continuously helps us optimize our operations."
